RE: FCC ID: OW3HT-3_ATCB006426

Attention:

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the cover letter states that changes in the circuitry were made (i.e. "PWB from HT-3 (1K8.035.730.A) will be assembled to size reduced plastic housing"). It is assumed that "PWB" means "printed wiring board". Normally changes in the design, shape or content of a PWB, unless these changes were insignificant, would mean retesting for at least radiated emissions to insure that the device is still compliant. Please explain what steps were taken to determine that no radiated spurious emissions testing was required. If this information is confidential, please submit it under the operational description exhibit and please provide a request for confidentiality for this exhibit.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Except as described in §0.459, correspondence and responses should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
