

RE: FCC ID: OW3RM-112\_ATCB003480

Attention: Guido Paland

1. Please note that the SAR values in the SAR report do not match the SAR values for FCC. Please provide a manual with both head and body SAR that matches those in the FCC SAR report.

**Answer:** New document in Exhibit 8 was uploaded. The document ' 8.3.1\_RM-112\_Exhibit08\_User\_Guide\_01.pdf ' shall replace the document ' 8.3.1\_RM-112\_Exhibit08\_User\_Guide\_02.pdf '.

2. Please note that the FCC and IC number are awfully close on the label. This may not meet the requirements of the FCC for ID labels on a single line.

**Answer:** New document in Exhibit 1 was uploaded. FCC ID and IC ID were shifted to separate lines. The document ' 8.3.1\_RM-112\_Exhibit01\_Label\_Location.pdf ' shall replace the document ' 8.3.1\_RM-112\_Exhibit01\_Label\_Location\_01.pdf '

3. The US SAR report has 2.2 cm separation but the manual say 1.5 cm. Please correct pdf page 102 of the manual to show 2.2 cm separation.

**Answer:** New document in Exhibit 8 was uploaded. The document ' 8.3.1\_RM-112\_Exhibit08\_User\_Guide\_01.pdf ' shall replace the document ' 8.3.1\_RM-112\_Exhibit08\_User\_Guide\_02.pdf '.
