RE: FCC ID: OW3RX-42\_ATCB005734  
Attention: Guido Paland

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the external photos and block diagram in the application appear to show a USB connector. This indicates that the device is also a computer peripheral device or possibly receives power via a USB connection. Please note that if the device is a computer peripheral device this it would require either a certification to 15B or a DoC to 15B. The label does not show the FCC DoC logo. Please explain if this is to be certified to 15B; or please explain the USB port. If it is a computer peripheral device as well, please provide the required part 15B test report in accordance with ANSI C63.4 requirements for computer peripheral devices.
2. Please note that in today's TDBC/FCC teleconference the FCC reiterated the need to show authorization from the grantee responsible party. Please note that Detlev Aust is the recognized responsible party for grantee code OW3. Please provide an authorization letter showing that Guido Paland is authorized to submit an application under grantee code OW3. Please also note that if the FCC grantee code information needs to be corrected on the FCC site, this should be done as soon as possible.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
