RE: FCC ID: OWDTR-0020-E\_ATCB001188

Attention: Daryl Popowitch

I have a few comments on this Application.

1. Please note that the equipment code on the 731 says this is a held to the face transmitter. Please note that as the device output is 54W this more than likely a TNB equipment code. Please note that the external photos also support the TNB code. Please correct the 731 to show the proper equipment code for this device. Alternately please explain how this can be a TNF.

Response: Please refer to the revised 731 form uploaded with this response.

2. The technical description of the device states that there is a low band and a high band of operation. However, only the low band has been tested. Please verify that this device only operates on the low band mentioned in the technical operations document.

Response: Please refer to the revised operational description uploaded with this response.

3. Please provide the tune up procedure for this device. Also, if the tune up procedure is to be confidential, please update the confidentiality request letter to include the tune up procedure.

Response: Please refer to the tune up procedure uploaded with this response. A revised confidentiality letter has also been uploaded.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination.

Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
