

American Telecommunications Certification Body Inc.

6731 Whittier Ave, McLean, VA 22101

April 2, 2004

RE: FCC ID: OWDTR-0021-E_ATCB001238

Attention: Rick McMurray

I have a few comments on this Application.

1. The 731 states that certification is being sought under rule parts 90, 95, 74 and 22. While I can see a 54W device under the trunked radio systems of part 90, I do not see how this 54 watt device fits under parts 95, 74 and 22. Please explain what specific rule subpart for each of the rule parts is applicable and/or correct the 731 form and report to show only those parts to which certification is requested. Please provide a listing of appropriate frequency bands for the rule parts desired.

Response: The client is seeking certification under Part 90. A revised test report and a revised 731 Form has been uploaded with this response.

2. Please note that while you have specified a mask (Mask D) you have not specified from which rule part this mask comes. For example, in section 6 of the report you refer to 2.1051 as the rule part under which testing was done but then you refer to Mask D. Please note there is no mask D in section 2.1051. Please specify the proper rule part when you specify an emissions mask or when specifying limits or OBW plots.

Response: Please refer to the revised test report uploaded with this response.
