TCB to address:

1) Please modify grant note as follows or similar, or explain if not appropriate:

Output power is conducted maximum per 90.205(r); nominal output power is xx W.

RESPONSE: The power as reported on the current grant is indeed conducted maximum power (36.4 W). Nominal output power is 35 W.

2) Per TCB training notes, e.g., May03, please submit uncertainty info/estimate for MPE test, or cite exhibit and page(s) if already there

"documenting MPE evaluation to demonstrate compliance

- test protocol and procedures
- test results - measured and processed data
- procedures used to determine compliance
- statement of compliance and measurement uncertainty"

RESPONSE: The total expanded uncertainty of the MPE measurements was +/-2.4 dB. Test methodology is shown on page 6 of the test report, test procedure on page 9, statement of compliance on page 13, and test results on pages 11 and 12.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal pursuant to Section 2.917(c).
