RE: FCC ID: OWDTR-0026-E

Attention: Daryl Popowitch / Kathy Grzovic
I have a few comments on this Application.

1. Please separate the alignment procedure (Tune up) into a separate exhibit
2. Please note that the MPE states uncontrolled/general population limits were used to determine MPE, but the manual states that the device is not intended for this environment. Please note that all of the products have this discrepancy. Please explain.
3. FYI – When listing the rule parts, it helps if not only the particular Part 2 section is listed but also the particular Part 90 section that is used to show compliance.
4. Emission Mask B item 3 states, "On any frequency removed from the assigned frequency by more than 250 percent of the authorized bandwidth: At least $43 + 10 \log (P)$ dB." This means that at 2.5 times the authorized bandwidth the plot should show a limit of -13dBm. The plot on page 16 of the report does not agree with this rule. Please explain.
5. Emission Mask C item 3 states, "On any frequency removed from the center of the authorized bandwidth by more than 250 percent of the authorized bandwidth: At least $43 + 10 \log (P)$ dB. This means that at 2.5 time the authorized bandwidth the plot should show a limit of -13dBm. The plot on page 18 of the report does not agree with this rule. Please explain.
6. Please indicate which emissions designators are 90.210.

A handwritten signature in black ink that reads "Dennis Ward".

Dennis Ward
