RE: FCC ID: OWDTR-0029-E

Attention: Daryl Popowitch / Kathy Grzovic  
I have a few comments on this Application.

1. Please separate the alignment procedure (Tune up) into a separate exhibit.
2. Please verify which emissions designators, if any, are for 90.210 designations.
3. Please note that the MPE states uncontrolled/general population limits were used to determine MPE, but the manual states that the device is not intended for this environment. Please note that all of the products have this discrepancy. Please explain.
4. Please note that plot 8.1 is said to be Mask C ( assumed 90.210 mask C). However, it does not follow the limits specified in mask C. Except for the final limit line which should be -13dBm the plot appears to follow mask B. Please explain and/or correct as necessary..
5. Please note that plot 8.3 is said to be Mask C. Please note that item 3 of mask C should be  $43+10\log(P)$  or -13dBm. The plot shows a limit of 0dBm (the 50dBc from item 2). Please correct the plots to show the proper limits.

A handwritten signature in black ink that reads "Dennis Ward".
