Hi Dennis,

Here's my answers to your comments and questions.

1. The Industry Canada ID is on the label. It is "IC: 36367B-0036". It wasn't put in the box with the FCCID.

2. The MPE evaluation was not included in the application because;

- I thought it was not required for the certification since the MPE will be evaluated at the licensing of the BTS
- I didn't notice the MPE comments in the user manual.

I have uploaded into the ATCB website the MPE calculations mentioned in the user manual.

I also copied this message into the ATCB website.

Regards,

### Denis Lalonde
