

Engineering and Testing for EMC and Safety Compliance

Accredited under A2LA Testing Certificate # 2653.01

October 14, 2008

American Telecommunications Certification Body, Inc.
6731 Whittier Avenue
Suite C110
McLean, VA 22101

Attention: Dennis Ward

This Class II permissive change is being requested for M/A-COM, Inc. FCC ID: OWDTR-0047-E (ATCB004931). The original FCC grant was issued on May 21, 2007.

Due to an oversight on my part, the 731 form submitted with the original certification application did not include a line of required data reporting frequency, power, frequency tolerance and emission designator that appeared in the test report, and that should have been included on the 731 form and thus the FCC grant.

The purpose of this Class II permissive change is to add this missing information to the FCC grant. There has been no change whatsoever in the product since it was originally certified. The test report still represents the product.

You will note that page 1 of the test report submitted with the original certification, and uploaded to support this Class II permissive change, includes the following line of data in the last line of the table. It is this data that we are requesting be added to the FCC grant through this Class II permissive change application.

Frequency	Rated Transmit Power (W)	Frequency Tolerance	Emission Designator
896-901 MHz	3.0 W	.63 ppm	8K8F1D/E

We appreciate your consideration of this information. Please contact me if there are any questions.

Thank you.
