

Engineering and Testing for EMC and Safety Compliance

Accredited under A2LA Testing Certificate # 2653.01

October 14, 2008

American Telecommunications Certification Body, Inc.  
6731 Whittier Avenue  
Suite C110  
McLean, VA 22101

SAR is not needed for this Class II Permissive Change because the conducted power has not changed. The SAR evaluation done with the original filing is still representative of the device. The M/A-COM radios use a constant envelope FM carrier and the conducted power does not increase as a result of modulation, versus SAR evaluation. SAR is evaluated with a constant carrier, maximum conducted power, which results in a worst case power level assessment.
