McLean, VA 22101

Subject: FCC ID: OWDTR-0049-E
IC: 3636B-0049.

M/A-COM seeks application approval for a Class 2 Permissive change on the M5300 900 MHz mobile radio.

The mobile radio is mounted in a desk top housing and is used in fixed applications. Documents included as exhibits describe the application and there is FCC correspondence allowing this variant to the mobile radio to be added to the mobile radio Grant. For fixed use, RF exposure is addressed at the time of site licensing and through an added Grant note. None of the RF characteristics of the originally Granted mobile radio product change as a result of the product variant. No test report is filed as a result of the product variant addition.

Rhein Tech Laboratories, Inc. agent authorization letter to act on M/A-COM's behalf for this change application, has been provide.

Thank you for your kind consideration and timely review for this new product entry to the M/A-COM radio product family.

Sincerely,

A handwritten signature in black ink that reads "Daryl G. Popowitch". The signature is written in a cursive, flowing style.

Daryl Popowitch
