FREQUENCY BAND ATTESTATION

XL-200P C1D1 NRB FCC ID: OWDTR-0146-E

The XL-200P C1D1 Non-Rebanded radio has been tested to operate in the US market per the frequency bands allowable per the FCC and Canada, however, the radio is capable to operate beyond those stated boundaries to support non-US markets. Harris has listed the complete operational frequency band within the User Manual, Operational Description, Block Diagrams and Alignment Procedure for these non-US markets.

Harris restricts users from modifying the device beyond those frequencies allowable by the FCC and Canada through radio Feature Encryption and Radio Personality Manager. Feature Encryption allows Harris to restrict the radio to only operate within the frequencies allowed by the FCC and Canada. Harris' Radio Personality Manager is a software application that also restricts the radio to only operate in the allowable FCC and Canada frequencies.

The frequency bands for which the XL-200P C1D1 Non-Rebanded radio has been tested to operate, allowable per the FCC and Canada, are listed below:

FCC

136-174 MHz
378-522 MHz
769-775 MHz
799-805 MHz
806-824 MHz
851-869 MHz
2402-2480 MHz
2412-2462 MHz
5180-5320 MHz
5500-5825 MHz
