Frequently Asked Questions

Q: My App can't connect with my products / devices

A: Connectivity issues mainly occur because of a weak bluetooth signal. Try these steps and see if they help the connection.

- Shorten the distance between your phone and the product.
- Turn off bluetooth functionality on your phone, and turn back on again. Try reconnecting the App with device again.
- If the Above two options fail, then try cutting the power supply, take the plug out of the socket. Once clear for a few seconds place the plug back in to the socket and turn the power back on. Try reconnecting the App with device again.

Q: App can connect with devices, but there are no product numbers displaying on the App, or product numbers are visible, but App cannot connect and control the products.

A: This could be because of a bad connection to the power supply. Unplug and insert the plug into the socket again, and turn on the power again.

- If the present password is different between the products and App, then reset the products (to do this, cut the power supply and plug into a socket, repeat this for 3 times quickly)
- If the above options fail, then exit the App close it down completely then turn the App back on again.

Q: If the product numbers visible are more than the actual products.

A: 1.The App may likely be connecting with nearby products, try setting a password for the products.

Q: If products change their mode without being controlled.

A: This could be because of a nearby neighbor using the App, you need to set a password for the products.

Important Safety Instructions

Use and Care Instructions:

C AUTION

- To reduce the risk of fire or electric shock, do not attempt to replace lamps or modify them.
- To reduce the risk of fire and electric shock: a) Do not install on trees having needles or sharp branch corners or materials which look like metal, and b) Do not mount suspending in a manner that can cut or damage wire insulation.
- Operation is subject to the following two conditions: 1) This device may not cause harmful interference, and 2) This device must accept any interference received, including interference that may cause undesired operation.
- Model No.: S1, S1A, S1A4, S1B, S1B4, S1B4A, S1B5

User Servicing Instructions:

Replace the fuse.

- Grasp plug and remove from the receptacle or other outlet device. Do not unplug by pulling on the cord.
- Open fuse cover. Slide open fuse access cover on top of attachment plug towards blades.
- Remove fuse carefully.
- Risk of fire. Replace fuse only with 3 Amp, 125 Volt fuse (provided with product).
- Close fuse cover. Slide closed the fuse access cover on top of attachment plug.
- Risk of fire. Do not replace attachment plug. Contains a safety device (fuse) that should not be removed. Discard product if the attachment plug is damaged.

If connecting to a lighting string that does not have a Wattage (W) rating (found on the tag within 6 inches of the plug), calculate the wattage as follows: Multiply the current (A) which is on the flag-type tag by 120.

For Example: Lighting string is rated 120V, 60Hz, 0.2 Amps. 0.2*120=24 Watts. Add the wattage of each light string together for a total of 216 Watts or less. (Do not exceed 216 Watts)

FEDERAL COMMUNICATIONS COMMISSION (FCC) STATEMENT

C Caution: Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

1) This device may not cause harmful interference, and
2) This device must accept any interference received, including interference that may cause undesired operation.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna; increase the separation between the equipment and receiver; connect the equipment into a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help.

RF warning for mobile device:
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20 cm between the radiator & your body.
