Model	WZPV4020, WZPV4015, WZPV4010
FCC ID	OXZWZPV2009
Agent	Northwest EMC, Inc.
Approval Type	Original
Equipment Class	UWB Ultra Wideband Transmitter
Rule Part	15.249 (15C)

Overview

This series of devices are installed on vehicles as a obstacle detection system for trucks and other vehicles. It is installed on the rear of trucks and other vehicles with blind stops while backing the vehicle. The transmitter operates under FCC rule part 15.249 and operates at 5.8 GHz as a pulsed radar detection system. The transmitter power is identical in all models. All models use identical hardware. Only the software in the sensor unit, which determines the detection range of the device, is different in the 3 models.
