

Exhibit 11: RF Exposure/Environmental Evaluation**Section 15.319 (i)****Requirement:**

Unlicensed PCS devices are subject to the radiofrequency radiation exposure requirements specified in § 1.1307(b), 2.1091 and 2.1093 of this chapter, as appropriate. All equipment shall be considered to operate in a "general population/uncontrolled" environment. Applications for equipment authorization of devices operating under this section must contain a statement confirming compliance with these requirements for both fundamental emissions and unwanted emissions. Technical information showing the basis for this statement must be submitted to the Commission upon request.

Demonstration of Compliance:

The IBS / 4070 IO-3AC36116 is classified as a mobile device, which is installed so that a minimum separation distance of 20 centimeters is maintained between the transmitter's radiating structure and the body of the user or nearby persons, and the ERP of the IBS / 4070 IO-3AC36116 is less than 3 watts. Therefore, the IBS / 4070 IO-3AC36116 is categorically excluded from routine environmental evaluation for RF exposure as per § 2.1091(c).

The installation manual contains a statement that instructs the installer that the 20 centimeter separation distance must be maintained in order to comply with the RF exposure requirement.
