

**FCC Modular Approval Request**

**Company name:** Hytronik Electronics Co.,Ltd. **FCC ID:** OZ3HFM-01 **FCC Part\_15\_Certification**

The table below contains the justification for Limit modular approval of this equipment:

<b>Requirement per KDB 996369</b>	<b>Explanation from grantee</b>
1, The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly.	Yes,It is fulfilled
2, The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal.	No, the module constantly emits electromagnetic wave at a frequency within $5.8G \pm 75MHz$ ,once the object movement has been detected, it will lead to the 5.8GHZ frequency fluctuation, so the output signal is a frequency variation.
3, The module must contain power supply regulation on the module.	No, there is no voltage stabilizing circuit inside the module, there must be an extra power supply to offer a voltage of $5V \pm 5\%$ to this module.
4, The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b).	Yes,It is fulfilled
5, The module must demonstrate compliance in a stand-alone configuration;	No,The module is powered supply with the circuit switch board.
6, The module must be labelled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labelling requirements).	Yes,It is fulfilled
7, The module must comply with all specific rules applicable to the transmitter including all the conditions provided in the integration instructions by the grantee.	No. The module must work with special amplification circuit
8,The module must comply with RF exposure requirements.	No, there is no requirement for 15.245
