

## **Circuit Description**

**This is a Surge protected power strip with two group remote controlled outlets.that is two sliding key,one is ON and one is OFF,when press ON/OFF button,the transmitter will transmit a signal to the encoder, and after the encoder,the dealed signal to the Mixer, which the osc is 433.92MHz,the mixed signal to the amplifier,the amplifier make the signal more stronger, and final to the antenna,send the 433.92MHz signal out .**
