To: jbrunett@umich.edu

Cc: "Valdis V. Liepa" <liepa@umich.edu>

Dear Mr. Brunett,

It is permissible to have a device sold without a user's manual, as long as the labeling information (RSS-GEN section 5.2) and the applicable statements (RSS-GEN section 7.1.5) are on the device.

In this case, you do not need to provide a user's manual with your application.

Best regards,

**Nicolas DesMarais**

## Response to Inquiry to FCC (Tracking Number 474491)

---

Generic Office of Engineering Technology &lt;oetech@fccsun27w.fcc.gov&gt;

Wed, Sep 27, 2006 at 12:30 PM

To: jdbrunett@gmail.com

**Inquiry:**

Please address the following two questions. 1) Is it permissible for a Part 15 device to be sold without a users manual (or other paper/electronic document) so long as all required statements (id number, rf hazard and interference warnings, etc...) are placed directly on the device? 2) If all required statements are placed on a device, must a users manual (or other paper/electronic document) be provided when applying for certification? Thanks. JDB

**---Reply from Customer on 09/22/2006---**

Just to verify I am understanding this correctly. Most applications require a users manual exhibit. However, that exhibit may be comprized of an ID label drawing or photograph, so long as that label clearly demonstrates all information required of the users manual for compliance. Please confirm. JDB

**Response:**

Your understanding is correct. Since the manufacturer does not supply an actual user manual, ! then they may use the product label which contains the required FCC information as a user manual exhibit.

Do not reply to this message. Please select the [Reply to an Inquiry Response](#) link from the OET Inquiry System to add any additional information pertaining to this inquiry.
