

To: Kyle Fujimoto
Subject: FCC ID: P2E01TPMS1 and P2E01TPMS2

Mr. Fujimoto,

In order for processing of this application (FCC ID: P2E01TPMS1 AND P2E01TPMS2) to continue, the following issue(s) will have to be addressed:

1) According to the sample FCC label, the FCC ID and compliance statement will be displayed only in the user's manual. It is acceptable, because of the small size of the units, for the compliance statements to be placed in the user's manual, instead of on the devices themselves; however, the FCC ID must always be displayed on each device. Please submit diagrams showing where the FCC ID will be placed on the devices.

Response: The FCC-ID will be shown on the devices with a sketch. The Applications have been split up per your request (see #5)

2) According to the user's manual (section 2.2), this system will transmit tire pressures to the receiver. Under the requested rule section, transmission of data is not allowed, only recognition codes. If the device does indeed transmit the actual tire pressures (data), and not a recognition code to tell the receiver to warn the driver of a problem, as inferred in the expository statement, perhaps the devices would be more properly classified under FCC section 15.231(e). Please submit a more detailed description of how the device operates.

Response: Please see the response to this under additional information. This exhibit has been uploaded for each application per your request (see #5)

(THE FOLLOWING QUESTION WAS ASKED AFTER THE APPLICANT TRIED TO SUBMIT BOTH DEVICES UNDER THE SAME FCC IDENTIFIER)

3) You are requesting that the two devices contained within this application be approved under the same FCC Identifier. Due to the fact that the schematics are different, along with the enclosures and board layout, they must be approved under two separate FCC identifiers. A new application must be submitted for one of the devices, and the current application must be amended to only include one device.

Response: The applications have been separated with a separate FCC-ID for each device.

The item(s) indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 60 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to scott@celectronics.com.

If you have any questions, feel free to contact me.
