RE: Integrated Engineering B.V.

FCC ID: P4E-SMARTPIN-8

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Please indicate where I may find both the 15.21 Information to User and the 15.19(a)(3) two-part compliance statements. Your label Exhibit indicates this information may be found in the Manual – if so kindly show me where it may be found.
- 2.) The Manual on page 4 appears to indicate that this device can work equally well with 125KHz as well as 13.56MHz devices. Does this also contain a 125KHz unlicensed Intentional Radiator? If so, kindly correct your Application and all Exhibits.
- 3.) The Label exhibit is incorrect. The proper format is to show 'FCC [space] ID:' in capital letters only followed by the FCC identifier – all on one line. The identifier can only consist of capital letters and numbers plus a [-] dash. You are required to correct your label
- 4.) Unless you tell me otherwise, I will call this device an "RF ID Card Reader" on the Grant. Is this acceptable?
- 5.) FYI: It is always helpful to provide some sort of occupied bandwidth spectrum plot in all Unlicensed radio equipment test reports. This is also a requirement recommended by ANSI C63.4. Kindly remember this detail for all future Test Reports.

William H. Graff
President

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
