Dear Mike,

The emission designator calculated as below:

$B_n = 2M + 2DK$   
 $B = 1000$   
 $M = B/2 = 500$   
 $D = 7580$   
 $K = 1.2$

$B_n = 2*500 + 2*1.2*7580/2 = 10096$   
emission designator: 10K0F1D

Attached please find the MPE calculation for the project.

Regards,

Steve

Notice\_content

-----  
Question #1: Please provide emission designator with necessary bandwidth.  
Please make sure justify the necessary bandwidth by using Carson rules.

Question #2: Please provide MPE data.

Question #3: User manual does not contain RF Exposure information. Please provide revised user manual to comply this requirement.

Best Regards

Mike Kuo / TCB Certifier

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information

within 60 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
