Federal Communications Commission
EQUIPMENT AUTHORIZATION BRANCH
7435 Oakland Mills Rd.
Columbia, MD 21046-1609

Subject: Declaration of Conformance
Reference: FRN 0005-0842-07
FCC ID: P57-FL60-1250

To whom it may concern:

As requested by ATCB, please find below further clarification in support the fact that the manufacturer of the aforementioned device, declares, in accordance with FCC rules and regulations, the following:

1. FCC 15.255(h) Prohibition on external phase-locking inputs

The device does not contain provision for external phase locking with other transmitters. Specifically, the device is not equipped with an external phase locking input that permits beam-forming arrays to be realized.

2. FCC 15.207(d) Conducted Limits

The device is designed for installation in an environment that allows it to be powered off 48VDC only. No provision is made on this unit that would enable it to be operated off AC power lines.

The above statements are true to the best of my ability.

Signed,

Ken Wood
Vice President of Engineering
Telaxis Communications Corporation
