CLASS 2 CHANGE DESCRIPTION FOR FCC ID P5MRFI400

This is a Class 2 application with the original FCC grant issued on 08 August 2023.

The changes implemented are (1) the addition of an analog modulation input which allows the transmission of voice, analog encoded data and analog encoded characters in 12.5 and 25 kHz channels and (2) DC operation instead of AC operation for input voltages. This required the hardware addition of a PCB to process the analog input signal and a firmware change to control the processing and interfacing of the additional modulation path.

The additional emission designators that we request to be added to this FCC ID are 11K2F2D, 11K2F3D, 11K2F3E, 20K0F2D, 20K7F3D and 20K0F3E.

Our FCC Registration Number (FRN) is 0011306867.

Kind Regards

Johan Svean
