Welcome (EN)

Thank you for your purchase of our STB-2882 Portable Stereo Headphones. This User's Guide will help you to learn the basic features. Please read it carefully before using.

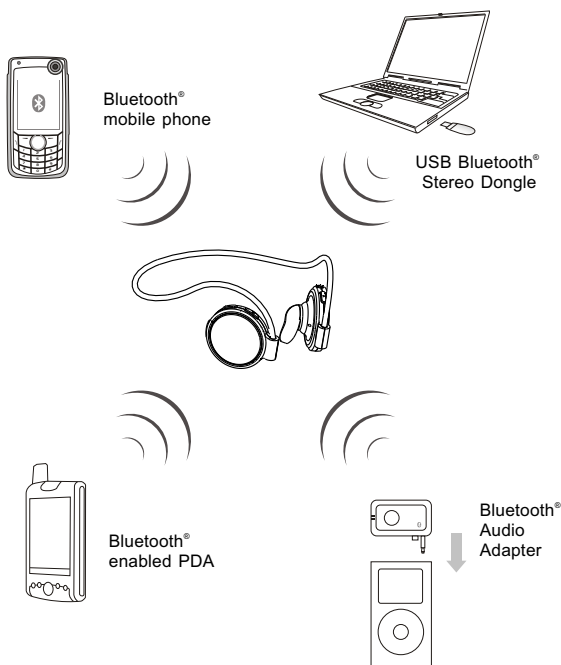

You will find the STB-2882 to be convenient, compact and easy to use. It's both a handsfree headset and a pair of wireless stereo headphones, perfect for all your favorite music files. Please note that your Bluetooth® music source must be able to transmit A2DP stereo - if not, you may need an accessory audio adapter. If you're not familiar with some of the technical terms in this Guide, please consult the glossary on page 15.

Operating Instructions (EN)

Demonstration

Operating Instructions (EN)

Charging

Use the USB cable included in the package to connect the STB-2882 with any USB port.

Charging will start automatically when the STB-2882 is connected and the red indicator light will turn on. It will then turn off when charging is completed.

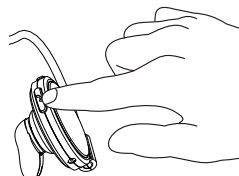

Note: Make sure you charge the unit for at least 3 hours before first use.

Power on/off

Press and hold the MFB for about 4 seconds to turn on, and two seconds to turn off. When the STB-2882 is turned on it will be in Standby mode.

Please note that the STB-2882 needs to be paired with another Bluetooth® source before it can transmit voice or music. See the next section.

about 4 seconds

Operating Instructions (EN)

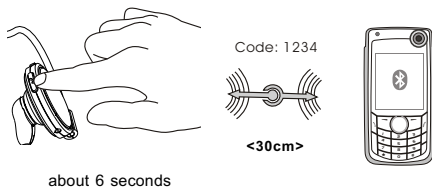

Pairing

"Pairing" means creating a trusted relationship between two or more Bluetooth® devices. The devices must be paired before they can communicate with each other. Pairing identification is stored for later use, and the devices will automatically recognize each other the next time they are connected. The STB-2882 will store up to 7 device IDs in memory, although it can only connect to one device at a time.

Note: Make sure the STB-2882 is "off" before starting the Pairing procedure.

How to pair with cellphones

1. Place the STB-2882 within 30 cm of the device to be paired with.

Operating Instructions (EN)

2. Press and hold the MFB for about 6 seconds, until the red and blue LEDs flash alternately. The STB-2882 will now be in Pairing mode.
3. Initiate the Bluetooth® search function in the cellphone. Please refer to the user's manual of the cellphone for more information.
4. Select "STB-2882" in the device list on the phone and follow the instructions to proceed.
5. Follow the instruction to enter the pairing code "1234". The red LED indicator will stop flashing if pairing is successful. The STB-2882's device ID will be stored in the device list of the phone so that no pairing will be required for the next use.

Volume adjustment

At any time during a phone call, or while playing music, the volume can be changed with the Vol+ or Vol- keys. There will be a tone from the speakers to indicate that the level has changed, and there will be a separate tone when at max. or min. volume.
