Dear Sir,

**Re: S1 (SND321) FCC Certification – Declarations for SAR Compliance**

In order to address your requirement for Body Worn SAR compliance of the phone, when deployed with a Lanyard and/or a belt holster, we agree to provide an addendum sheet with all standard User Manuals destined for the USA market, with the following statements:

**User Manual Addendum – Text:**

1. Until such a time as Sendo complete a Class 2 TCB change/update, to include Body worn SAR compliance with zero separation distance for use of the phone with a neck strap, Sendo will include an addendum sheet with all standard User Manuals destined for the USA market, with the following statement:

Addendum Sheet for inclusion to the User manual:

"Lanyard Neck Strap:"

"The lanyard feature for attachment of a neck strap is not approved for use in the USA."

2. "Holster & Belt Clip"

"Only the Sendo supplied and approved Holster & Belt clip may be used for the USA market."

We trust that this fully addresses all outstanding issues in order for BABTPS to complete the TCB assessment for the S1 (SND321) GSM phone, and also the S601 Rev 7 to follow.

Please do not hesitate to contact me if I can be of any further assistance

Best regards,

Paul G Didcott
