INTERNET CALL :

Before making internet calls, you are kindly requested to subscribe to any Internet telephony service provider for which we will inform you after the integration with them.

Now, bellow internet telephony service providers :

-. www. Iloveschool.co.kr : IN KOREA

-. www. Chocophone.com : IN ITALY

-. www.deltathree.com(ongoing) : IN AMERICA, ENGLAND, ISRAEL

-. In future, this is planed to connect with Net2phone, phonefree etc.

(1) INTERNET CALL :

If you subscribe to any internet telephony service provider, you can place internet calls as bellows.

-. Pick up the hand set

-. Push log-in (⟳) key and then find " the telephone icon " popping on your screen ,to which you subscribed.

-. Dial the telephone number (standard or Internet call) that you want.

-. Push log-in (⟳) key.

-. You can start the communication.

-. After finishing calls, you make sure of hanging up the hand set completely.

(2) STANDARD CALL :

-. Pick up the hand set.

-. Dial the standard phone number that you want.

-. You can start the communication.

-. Hang up the call.

(1) Special Key functions on Internet call :

A. Hold Key :

During any call between internet or standard call, if the other phone is ringing, you can receive that with pushing hold key, keeping current call waited. After finishing the call you took, you can come back to the previous call with pushing hold key again and continue that.

Please do not forget " hanging up the phone " after finishing the call.

B. Phone book :

On internet call, you can refer to phone lists you registered on the web site of internet telephony service provider. So this will make you remove the inconveniences you keep phone lists in your memory.

C. # KEY :

This helps you to delete " the wrong digits " you dialed during call.

F. LEDs

PSTN LED : **Red** – Lighting on standard call

IP LED : **Green** – Lighting on internet call

5. INFORMATION TO THE USER

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one more of the following measures:

-. Reorient or relocate the receiving antenna.

-. Increase the separation between the equipment and receiver.

-. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-. Consult the dealer or an experienced radio/TV technician for help.

WARNING: Changes or modifications not expressly approved by the manufacturer could void the user' s authority to operate the equipment.
