

VERTU

MANUFACTURER'S DECLARATION

Photos Clarification.

Product

FCCID: P7QRM-267V GSM850/900/1800/1900 Phone.

Declaration

This is to clarify that the photos originally supplied were from another sample. This approach was taken to avoid the need to dis-assemble the product, and risk any possible damage, before all testing had been completed.

The Phone photographed and the Test sample shown in the SAR Report varied in that it had a different cosmetic finish, in Brown rather than Black leather. This is a cosmetic difference only, and both are the same type of leather.

Vertu low volume production phones with this FCC ID, may typically have a number of cosmetic color / pattern / plain / matt / metal finishes, for what is the same electrical product, giving the same performance.

Place of Issue: Church Crookham
