4. USB connection is disconnected

7. Basic Function

Hardware

Size: (length* wide*thick) 112*76*12.8mm

CPU processor speed: 500MHZ

Memory: 4G-16G

RAM: 256 MB

TF card: 128M-16G

Display screen: 4.3"(Capacitive multi-touch) TFT resistive touch

Resolution: 480*272

Battery and capacity: rechargeable Built-in type polymer battery, [1200mAh](#)

USB: USB 2.0 OTG

G-sensor: 3D

Record: built-in microphone

Operation System: Android 2.3

Video: MKV (H.264HP). AVI. RM RMVB. FLV. MPEG-1/2

Music: MP3.WMA.APE.FLAC.AAC.AC3.WAV

Pictures: JPEG. BMP. PNG.TIF

8.Important Safety Precautions

Read these safety instructions before using your device and store them for possible future reference. Always follow these basic safety precautions when using your Tablet. This reduces the risk of fire, electric shock, and injury.

- Do not expose this product to rain or moisture.

- Keep the device out of direct sunlight and heat sources.
- Protect the power cord. Route power cords so that they are not likely to be walked on or pinched by items placed on or against them. Pay particular attention to the point where the cord attaches to the device.
- Only use the AC adapter included with the device. Using any other power adapter voids your warranty.
- Do not remove the cover. There are no user-serviceable parts inside.
- If the charger cord is damaged, have it repaired by the manufacturer, its service or a similarly qualified person in order to avoid any hazard.
- The charger is not intended for use by persons (including children) with reduced physical, sensory or mental capacity. Persons who have not read the manual, unless they have received explanations by a person responsible for their safety and supervision should not use this unit.
- Children should be monitored to ensure that they do not play with the charger.
- The charger should always be readily accessible.
- The device should not be exposed to dripping or splashing water.
- No objects filled with liquids such as vases shall be placed on the device.
- Always leave a minimum distance of 10 cm around the unit to ensure sufficient ventilation.
- Naked flame sources, such as candles, should not be placed on top of the device.
- The device is intended for use only in a temperate climate.
- CAUTION: Danger of explosion if battery is incorrectly replaced or not replaced by the same type or equivalent.
- The battery should not be exposed to excessive heat such as sunshine, fire or similar.
- Different types of batteries, new and used batteries should not be mixed.
- The battery must be installed according to the polarity.
- If the battery is worn, it must be removed from the product.
- The battery must be disposed of safely. Always use the collection bins provided (check with your dealer) to protect the environment.

Clean Your Device

Treat the screen gently. To clean fingerprints or dust from the screen, we recommend using a soft, non-abrasive cloth such as a camera lens cloth.

SWITCH OFF IN RESTRICTED AREAS

Turn off the power when the use of the tablet is not authorized or when it may cause interference or danger, for example; on board an aircraft, near medical equipment, fuel, chemicals or blasting sites.

ROAD SAFETY COMES FIRST

Check the current laws and regulations in the area where you drive, regarding the use of mobile devices such as this tablet.

- Do not hold this mobile device while driving

- Concentrate fully on the driving
- Radio Frequency (RF) can affect certain electronic systems in your car, such as the audio-stereo system or security equipment.
- An airbag inflates with great force. Do not store the tablet or any of its accessories in the area above the bag or in its deployment area.

INTERFERENCE

All wireless devices are susceptible to interference which can affect their performance.

AUTHORISED PERSONNEL

Only qualified personnel are authorized to install or repair this product

ACCESSORIES

Only use batteries, chargers and other accessories which are compatible for this device. Do not connect incompatible products.

KEEP YOUR DEVICE DRY

Your device is not water proof. Keep it dry.

CHILDREN

Keep the tablet in a safe place out of the reach of young children. Your tablet contains small pieces which can present a choking hazard.

Precautions for use

Vehicles : Telephone radio- frequency emissions can affect a motor vehicle's electronic systems. With regards to your vehicle, check with the manufacturer or dealer.

Medical Implants :

To avoid any interference with the medical device, manufacturers of medical devices recommend a minimum distance of 15cm between wireless equipment and a medical implant such as a pacemaker or defibrillator. The following is recommended to people who have such devices :

- Always keep the wireless device at a distance of over 15cm from the medical device.
- Do not carry the wireless device in a breast pocket.
- Hold the wireless device at the ear opposite the medical device
- Turn off the wireless device if there is any suspicion of interference occurring.
- Follow the instructions provided by the manufacturer of the medical implant.

If you are fitted with a medical implant and have any questions regarding the use of wireless equipment, consult your doctor.

Hearing :

Warning : If you use headphones there is a risk of not being able to hear outside sounds clearly. Do not use headphones if there is a risk of endangering your safety. Some wireless devices can interfere with the proper functioning of hearing aids.

Other medical devices :

Radio transmitting equipment, including wireless devices such as this tablet, can interfere with the operation of inadequately protected medical equipment. Consult a doctor or the manufacturer of the medical equipment to see if the equipment is adequately protected from external Radio Frequency energy. Turn your device off in places where regulations apply, especially in hospitals.

Health Facilities :

Hospitals and health facilities may be using equipment that is particularly sensitive to external radio-frequency emissions. Turn your tablet off when staff or signs tell you to.

Blasting sites and identified areas :

Switch off your equipment in zones where the atmosphere is potentially explosive. Follow all official instructions. Sparks in such areas could cause an explosion or fire, resulting in serious bodily injury or death. Switch off your device in gas stations, especially near the gas pumps. Carefully observe instructions on use in fuel depots, storage and distribution areas, at chemical plants or in areas where explosives are used.

Areas with a potentially explosive atmosphere are often, but not always clearly marked. These include areas where it is normally advisable to switch off engines, the area below deck on boats, facilities where chemicals are transferred or stored and areas where the air contains chemicals or particles such as grain, dust or metallic powder. Check with the manufacturers of vehicles that use LPG (such as butane or propane) if the device can be used safely in their vicinity.

All our tablets conform to international standards and regulations, and where appropriate national recognition, to limit the exposure of users to electro magnetic fields. These standards and regulations were adopted after extensive scientific research. This research does not link the use of mobile phones with any adverse effects on health if the equipment is used in accordance to standards and regulations.

However, if you want to reduce the levels of exposure to radio frequency radiation you can limit your time using the tablet in wireless mode because the length of time is a contributing factor to the exposure received by a person. Similarly, keeping the tablet away from the body is another factor, as exposure levels lessen dramatically with distance.

Disposal of old electrical appliances

THE DISPOSAL OF ELECTRICAL AND ELECTRONIC EQUIPMENT WASTE PRODUCTS ON THE PART OF FINAL USERS IN THE EUROPEAN UNION

This symbol on the product or on the container indicates that this product cannot be eliminated with the general waste. The user is responsible for eliminating this kind of waste by throwing them away at a “recycling point” specifically for electrical and electronic waste. Selective collection and electrical equipment recycling contribute to preserve

natural resources and warrant waste recycling to protect environment and health. In order to receive further information about electrical and electronic waste collecting and recycling, contact your Local Council, the service of household waste or the establishment where the product was acquired.

Disposal of old electrical appliances

The European directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE), requires that old household electrical appliances must not be disposed of in the normal unsorted municipal waste stream. Old appliances must be collected separately in order to optimize the recovery and recycling of the materials they contain, and reduce the impact on human health and the environment.

The crossed out “wheeled bin” symbol on the product reminds you of your obligation, that when you dispose of the appliance, it must be separately collected.

Consumers should contact their local authority or retailer for information concerning the correct disposal of their old appliance.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
