RE: FCC ID: P93-STR7200-1

Attention: Nicole Golden

I have a few comments on this Application.

- 1 There are no schematics provided with the application. The file labeled confidential_Schematic Exhibit J.PDF does not contain schematics.
- 2 15.231a does not allow data transmission. This device apparently transmits data and is therefore not certifiable using 15.231a. Data transmission is allowed under 15.231e limits. Please retest and apply the correct 15.231e limits. Alternately, explain why the manufacturer believes this device does not transmit data.
- 3 The block diagram does not show the antenna connection. Please provide a block diagram showing the antenna location.
- 4 The internal photos do not show all boards. Please provide photos of all boards top and bottom.
- 5 The manual does not appear to have the required Part 15 statements. Please correct the manual to include the warning about not modifying the equipment. If this is a Class A digital device you must also include the statement in 15.19.

A handwritten signature in black ink that reads "Dennis Ward". The signature is cursive and fluid, with "Dennis" on the top line and "Ward" on the bottom line.

Dennis Ward

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination.

Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
