Dear Ms. Helen Zhao,

Thank you for your e-mail.

We would like to inform you for the following question.

Question #1: The EUT photos show a PCB board is attached to a touch screen (glass). Does the EUT consist of these two parts? What is the controller referred on the user manual? Please explain what is the white stuff on the LCD monitor. Please provide more detailed information as how you setup for the test.

- -> Yes, the EUT consist of two parts, one is PCB board(Controller) and the other is touch screen(glass). The controller referred on the manual is PCB board. And white stuff on the LCD monitor is not related product, it is a mere paper folder. The controller(PCB board) was installed in the inside of LCD monitor and connected with USB port of PC.

If you have any question or need more information, please feel free to contact us.

Thank you and have a great day!

Best Regards,

S. C. Hong / Project Engineer
