

SkyGuard Label

The image shows a medical device, likely a biofeedback or bioelectricity unit. It consists of a main grey rectangular unit on the left and four white electrode leads on the right. The main unit has a red display screen at the top and a large grey rectangular area in the center. A white label with the text "Label Location" is placed on the main unit. The four electrode leads are connected to the main unit and have coiled white cables with gold-colored connectors at the bottom. The entire setup is on a blue background.

Label Location
