Dear Mike Kuo

Thank you for your cooperation.

Please see the attached files.
(Report, Setup Photo, External Photo, Internal Photo, Label, Manual, FM
Operating explanation, Circuit Diagram, Block Diagram)

For your reference...
Some part of appliances changed by spurious and radiated emission problem.
So, achieved retest and made out again test report.

I will send you confirmation letter asap. (Applicant's president is examining
that confirmation letter)
Please check attached files before I will send you confirmation letter.

Should you have any questions or comments, please let me know asap.

Best Regards

Michael

Notice_content

Question #1: What is this device going to be used for or with ? During the
radiated emission tests, the device is connected to Personal computer. Is
this intended usage ? The software program that you used in Window media
player. How this program is related to the device function ?

Question #2: User Manual does not contain the information required under
15.21 of FCC rules. Please provide revised user manual.

Question #3: In accordance with 15.215(b) of FCC rules, In no case shall the

level of the unwanted emissions from an intenitonal radiator operating under these additional provisions exceed the filed strength of the fundamental emission. There are several spurious emissions are higher than the fundamental emission field strength. Please address this non-compliance issue.

Question #4: Since modificatons were made during the final compliance tests. Please provide a cover letter signed by the applicant to agree to incorporate the modifications to each sold in the U.S.

Best Regards

Mike Kuo / TCB Certifier
