RE: Declaration of Differences between Q4000 and QPRO

To Whom It May Concern:

The Q4000 modem may contain one or all of the following: GSM/GPRS radio, Iridium Satellite radio, GPS, processor, RS-232 serial ports, Digital I/O, Analogs, and CAN Bus.

The QPRO is simply a Q4000 modem within an IP-67 enclosure.

Thank you for your attention to this matter.

Yours faithfully

Darrin Calin
