application for GN Netcom, FCC-ID: PB7GN9000

Dear Sirs,

The system GN 9000 Bluetooth (FCC ID: PB7GN9000) consists of two components, the GN 9010 Headset and the Base unit. Both components are radio transmitters.

Both compents have been tested seperately according to the FCC rules. Uploaded documents related to the base unit are named with base_xxxxx.yyy, documents related to the headset are named with headset_xxxxx.yyy, and documents related to both are named with both_xxxxxx.yyy

The grant should be issued for the whole system, because both components are marketed under the same name, GN 9000 Bluetooth.

Thank you very much

With kind regards

Torsten Lohoff
