Attention: Reviewing Engineer
Re: Class 2 permissive change application for Vyyo Inc.
FCC ID: **PJV284-PLUS-A**
Date of Original Grant: 11 April 2006

Equipment: Part 27 Non-Broadcast Transmitter, 776-777 MHz

Hello,

On behalf of my client Vyyo Inc. I am submitting an application for a class 2 permissive change for the equipment associated with the referenced identifier. The firmware and software of the referenced device have been modified to accommodate channel bandwidths of 200 kHz, 300 kHz, and 400 kHz. No hardware changes have been made to the product. The affected rule sections are 47CFR27 sections 27.53 (d) through (f).

A test report has been submitted demonstrating that out of band emissions are well within the attenuation minimum of $43 + 10\log P$ dB below transmitter output power (-13dBm limit), as required by paragraphs 27.53(d)3 and 27.53(f).

If you have questions or need further information, please contact the undersigned.

Sincerely,

THOMAS N. COKENIAS
EMC Consultant
Agent for Vyyo Inc.
