Re: Class 2 Permissive change for Vyyo Inc.

FCC ID: PBJV284-PLUS-A  
Licensed Non-Broadcast Station Transmitter – Subscriber Station

Hello,

Vyyo has applied for a class 2 permissive change on the referenced equipment. A new ruggedized case has been developed for use in telecommunications centers and other harsh environments.

The transceiver boards are identical to those used in the previously certified product. A new power supply has been installed and a Cisco WiFi module is also located inside the enclosure. The WiFi module has received modular certification on its own.

The model number for the ruggedized version described above is V290ai.

If you have questions or need further information, please contact the undersigned.

Sincerely,

THOMAS N COKENIAS  
Agent for Vyyo Inc.
