Hi Doug,

My apologies but Dell has requested a model change on the grants ☹. The model number they want is W01A to replace W01A001.

Unfortunately they decided to change up the model number for this one but failed to inform me about it.

Very sorry for the extra work.

Thanks,  
Steve

***Attached is the Grant of Equipment Authorization for this device. Please note that according to Section 2.962(g)(2) of the FCC Rules & Regulations (47 CFR), the TCB is mandated to perform Surveillance testing on 5% of the total certifications performed. According to Section 2.962(g)(2) the grantee is expected to have ample production samples available in the event this device is requested as a sample. Explanations such as item no longer manufactured, or not marketed in the United States does not absolve the grantee from providing a sample whether requested by the TCB or the FCC. Failure to provide a post-grant production sample(s) may result in FCC action that will affect the use of this Grantee Code for future equipment authorization. Additionally, the FCC requires that the applicant make provision to have production samples available for at least one year after the last production date for a post-market surveillance test. Samples may be requested at any time by either a TCB or the FCC.***

Attached is the Technical Acceptance Certificate (TAC) for this application. Note that you must wait until the certification appears on the IC REL database before you may distribute, lease, sell, or offer for sale the device. You may monitor IC's REL by using the following web site address:
