McLean, VA 22101

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for a Modular approval of an intentional unlicensed & licensed transmitter. On behalf of our client, Aegis Labs has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 & 27 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2, 15, and 27 of the Code of Federal Regulations.

This is a Class B Computing Device Peripheral approval of the Intel WiFi/WiMax Link 5150 (MN: 512ANXHMW, FCC ID: PD9512ANXHD), which is a WiFi/WiMax adapter (802.11a, 802.11b, 802.11g, 802.11n, and 802.16e). It was tested installed in an extender board connected to the host laptop's PCI-E slot with a set of Shanghai Universe Communication Electron Co., Ltd Antennas continuously transmitting from Chain A antenna port.

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

Johnny Candelas
