G.2 PD Test positions

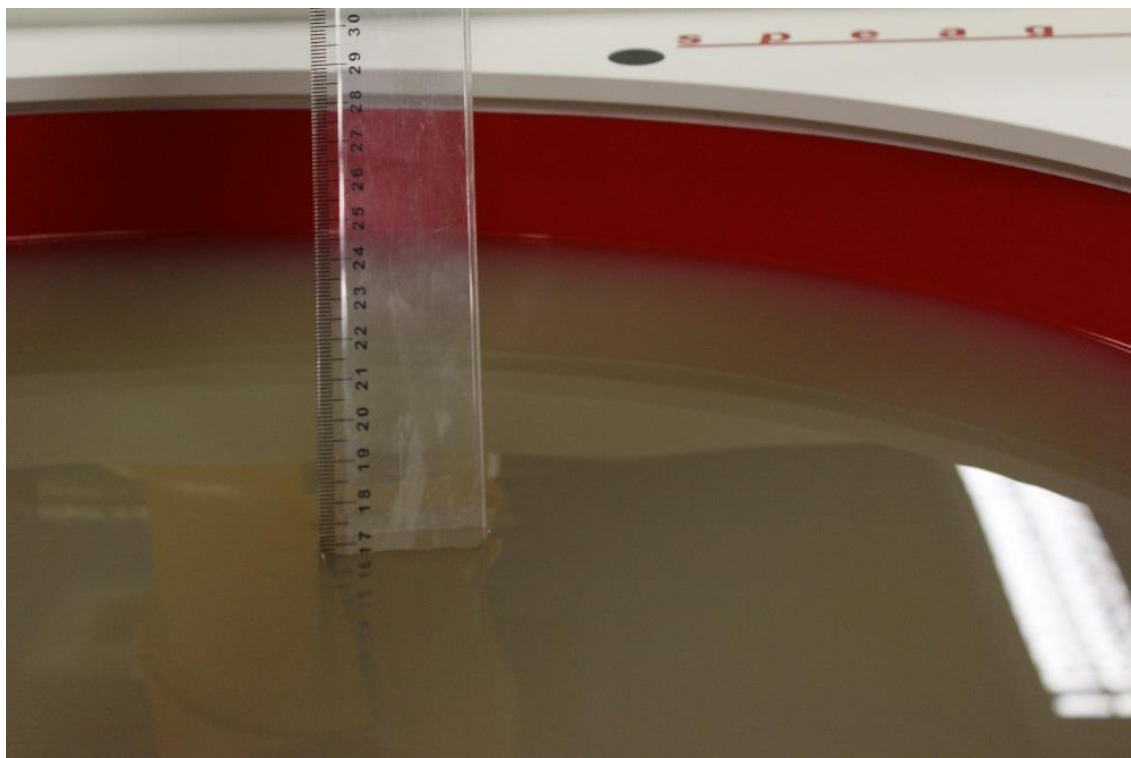

G.3 SAR Test position

Laptop  A photograph showing the underside of a laptop. A black foam pad is placed on the bottom surface. Below the pad, a transparent acrylic block is visible, which houses a circuit board with two white cylindrical components. A black cable with a red connector is plugged into the bottom of the laptop.	Bottom Edge  A photograph showing the bottom edge of the laptop. The transparent acrylic block and the circuit board with white components are visible. The black cable with the red connector is also present.
Back Face  A photograph showing the back face of the laptop. The black foam pad is visible, and the transparent acrylic block with the circuit board is positioned below it. The black cable with the red connector is plugged into the back of the laptop.	Left Edge  A photograph showing the left edge of the laptop. The transparent acrylic block and the circuit board with white components are visible. The black cable with the red connector is plugged into the left side of the laptop.
Right Edge  A photograph showing the right edge of the laptop. The transparent acrylic block and the circuit board with white components are visible. The black cable with the red connector is plugged into the right side of the laptop.	

G.5 Phantom liquid level during measurements

ELI phantom Head liquid SAR SPEAG HBBL600-10000V6 Batch - 191016-02
