

Testing Appendix

Appendix J. Total Exposure Ratio Analysis

According to FCC guidance in Oct. 2022 TCV workshop and IEC TR 63170, the total exposure ratio calculated by taking of ratio of maximum reported SAR divided by SAR limit and adding it to maximum measured power density divided by power density limit. Numerical sum of the ratios should be less than 1.

< Tablet Mode >

Position	Max Wlan 6GHz 4cm ² (W/m ²)	Max BT Ant 1g SAR W/kg	Total Exposure Ratio
Left Side	2.642	0.066	0.31

< Laptop Mode >

Position	Max Wlan 6GHz 4cm ² (W/m ²)	Max BT Ant 1g SAR W/kg	Total Exposure Ratio
Bottom	4.926	0.128	0.57
