Ref: FCC Class II Permissive change for FCC ID: PD9AX211NG

Dear Examiner,

This is to request a Class II permissive change for module approval FCC ID: PD9AX211NG, originally granted for DSS, DTS, UNII on 02/17/2021, for 6XD on 04/26/2021 and for UNII-4 on 08/29/2022.

Change #1: This change establishes portable category SAR conditions for the Dell model P182G with Wistron antenna Part number 0772W9 and 08V97D.

Our intention is to apply the PAG re-use process for granting approval due to the Dynamic SAR feature using G/Hall sensors. The seed PAG under TXSENS was previously performed under ATCB029687.

The Contention based protocol (CBP) testing was done in conducted at the RF port of the module with a worst case of lower antenna gain of -2dBi. The lowest antenna gain of the host is 1.84dBi passing the CBP requirement.

Sincerely,

By:

Steven C. Hackett
