Ref: FCC Class II Permissive change for FCC ID: PD9AX211NG

Dear Examiner,

This is to request a Class II permissive change for module approval FCC ID: PD9AX211NG, originally granted for DSS, DTS, UNII on 02/17/2021 , for 6XD on 04/26/2021 and for UNII-4 on 08/29/2022.

Change #1: This change establishes portable category SAR conditions for the Dell model P182G with WNC antenna Part number 0772W9 and 08V97D.

Note(s):

- The Platform is already approved under Certificate number ATCB030213. The antenna is unchanged. The only change is the addition of TAS feature for 2.4GHz, 5GHz, 5.9GHz bands.
- The exact same WLAN authorized modules are reused in this notebook with the exact same TAS algorithm validation methods for time averaging SAR as approved by FCC.

Our intention is to apply the PAG re-use process for granting approval due to the Dynamic SAR feature using G/Hall sensors.

Sincerely,

By:

Benjamin LAVENANT
