Ref: FCC Class II Permissive change for FCC ID: PD9BE201NG

Dear Examiner,

This is to request a Class II permissive change for module approval FCC ID: PD9BE201NG, originally granted on 03/13/2024 under mobile configuration and on 05/06/2024 under portable configuration.

Change #1: This change establishes portable category SAR conditions for the Dell model P197G Notebook PC with antennas part number F-0G-FS-6194-001-00, F-0G-FS-6194-002-00.

- The WLAN TAS feature is enabled on 2.4GHz and 5GHz band. The exact same WLAN authorized modules are reused in this notebook with the exact same TAS algorithm validation methods for time averaging SAR as approved by FCC.
- The IPD measurement is conducted on a single channel instead of the five channels permitted by the FCC upon inquiry shared on this filing.

Yours Sincerely,

A handwritten signature in black ink, appearing to read "Benjamin Lavenant".
