McLean, VA 22101

**AEGIS LABS INC.**

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for a modular approval of an intentional unlicensed transmitter. On behalf of our client, Aegis Labs has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2 and 15 of the Code of Federal Regulations.

This is a modular approval of the Intel PRO/Wireless 3945ABG Network Connection (MN: WM3945ABG, FCC ID: PD9LEN3945ABG), which is a WLAN adapter (802.11a, 802.11b and 802.11g). It was tested externally to a computer chassis with a set of Ethertronics multi-band antennas continuously transmitting and receiving from the MAIN and AUX antenna ports.

This mobile / portable device is being submitted for a modular approval and will have Class II Permissive changes to add system level approvals. The systems will also have a bios lock for a user installable option. A letter explaining the bios lock will accompany the future Class II Permissive change applications.

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

Johnny Candelas
