AEGIS LABS INC.

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for a Class II Permissive Change approval of an intentional unlicensed transmitter. On behalf of our client, Aegis Labs has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2 and 15 of the Code of Federal Regulations.

This is a Class II Permissive Change approval of the Intel PRO/Wireless 2915ABG Network Connection (MN: WM3B2915ABG, FCC ID: PD9WM3B2915ABG), which is a WLAN adapter (802.11a, 802.11b and 802.11g). It was tested externally to a computer chassis with a set of Wistron Neweb Corporation (Acer Solution 2), Wistron Neweb Corporation (Acer TravelMate 4050), Foxconn (Sony I306), Phycomp/Yageo Corporation (Sony I275), Amphenol (Samsung Neon), and Hitachi (Samsung Neon) multi-band antennas continuously transmitting and receiving from the MAIN and AUX antenna ports.

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

Rick Candelas
