

USER GUIDE MANUAL

VoIP

Caution : Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Thank you for purchasing VoIP's Internet phone.

Please read this manual carefully before using the product. Then, it becomes much more convenient to use.

If you have any questions while using this product, please contact the head office or the sole agent.

1. Product Introduction

CIP 100

PC Interface : Serial or USB Port
Feature : Phone Book, Direct WEB Access
Component : Phone Unit, Integrated Connection Cable

CIP 200

2. Features

Is this really an Internet Phone?

Unanimous voice. This is the exclamatory question made in expressing the surprise at the crystal-clear sound quality of CLARIFONE's telephone communication. As it is a digital telephone for exclusive Internet use which has adopted the digital signal processing technology, CLARIFONE provides excellent sound quality.

Install at once without a soundcard and use like ordinary phones. As it does not use any soundcard made to be appropriate for enjoying games or music, if you connect it to your computer's serial port or USB port and install just the software, you can use CLARIFONE more conveniently than ordinary phones without making a connection to any web site.

Do you still have to see advertisements in order to make a phone call? Only by paying the charges for connecting to inside-city telephones from the Internet, you can use out-side city telephones and international telephones like inside-city telephones. Of course, telephone calls between CLARIFONE users are free-of-charge.

3. Main Functions

- You can make telephone calls just by picking up the phone without having to connect to the Internet and logging in your ID.
- By using the number system PIN(CLARIFONE Identification Number), which is the same as ordinary phones, the same user environment as ordinary phones is provided.
- As it follows the international Internet phone standard H.323 V2, it is compatible with other types of machines.
- Telephone directory, quick dialing, and redialing functions
- DWA (Direct Web Access) button function
- Voice-recognition telephoning (planned)
