RE: Senton Enterprises Limited

FCC ID: PEG35178-B

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Please explain how some of the Average measurements are greater than the peak measurements on page 15 of the report.
- 2) No radiated measurements appear above the fundamental. Note that 15.33 states this device must be investigated up to 40 GHz. Please explain.
- 3) The base has more functions than simply a TX. The users manual therefore is missing information regarded by 15.105. Please revise.
- 4) The Base appears large enough that the label should include the 2 part FCC statements from 15.19(a)(3). Please add/correct.

A handwritten signature in black ink, appearing to read "Timothy R. Johnson".

Timothy R. Johnson
Examining Engineer
