Subject: Instruction Manual/Compliance Statement for ASAT2 (Door/ Trunk Oscillator)

Dear Sirs,

Our product ASAT2 is a Door/ Trunk Oscillator for cars. It will be already installed in cars (as original equipment) when it will be placed into the US market.

We, Aisin Seiki Co., Ltd., confirm that we do not issue any users manual and no advertising literature for this product.

Compliance Statement (FCC rules 15.19(a)): Because our transmitter is too small to place the compliance statement on it and because we do not issue any users manual for our transmitter, we hereby confirm that we will inform the car manufacturer that the compliance statement must be included in the users manual of the car. The car users manual is used as a replacement for our products users manual.

Information to user (FCC rules 15.21): We confirm that we will inform the car manufacturer that the car users manual has to include information to the user. The information shall state that changes or modifications which are not approved by the manufacturer could void the user's authority to operate the above mentioned radio equipment.

Yours Sincerely,

Toshimitsu Oka

Manager, 2nd Electronics
Electronics Engineering Dept.
