FLASH USB DRIVE

Introduction

A compact, light and movable storage device (external drive)

Well-designed and integrated plan.

New generation and new tech Storage Device

Save your favorite movie into Flash USB Drive sized by your lips.

Flash USB Drive can make transporting your data faster than others by via USB port and save the word document over 60,000.

Almost two times capacity as much as CD-R.

The first portable storage device, manufactured by Korean Technology.

The storage device of semi-permanent usage

Not need any power device, cable or installation of a complicate program. Protection from the hacker's attack and safe storage of important files.

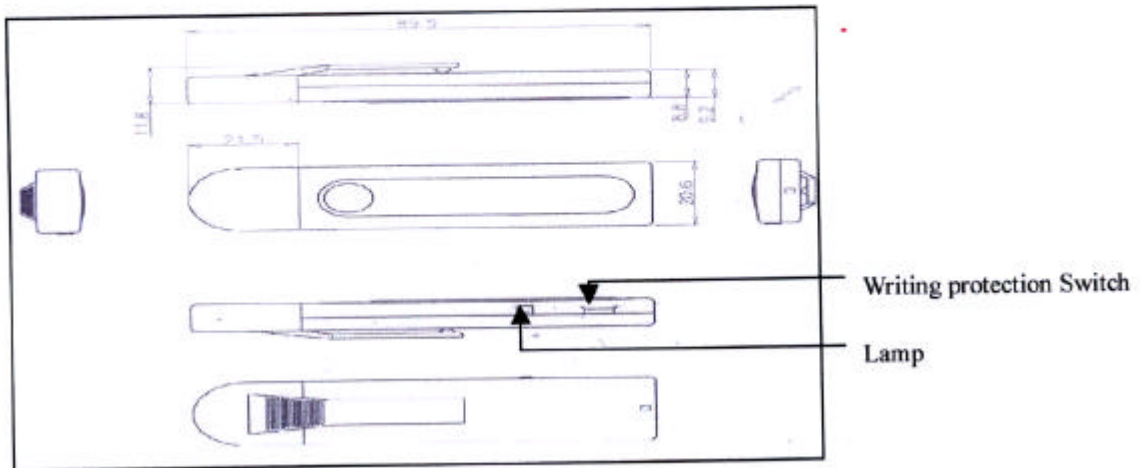

On inserting the USB port, you can install immediately and easily use it like Windows' hard disc drive. Freely you can hang on the neck, insert in your pocket and take your favorite multi-media movie, music and big capacity graphic file. For Windows 98/ SE/ME/2000 and Mac(Dec. 2000).

● Feature and structure

- Easily movable myself file(in pocket or hang on the neck)
- Not need to buy battery
- Plug & Play in USB port(easy installation)
- The same as usage of hard disc drive
- A compact size as size as your lips (79mm × 20mm × 10mm : 16MB~ 64MB) and light weight (50g)
- Electronic mode by Flash memory, not mechanical storage mode
- For windows 98/SE/ME/2000 version
- Support IBM PC/AT or compatible Desktop / Notebook / Sub-Notebook / Laptop computers (Pentium® @ 100MHz or better) with USB ports.
- Support UHCI(Universal Host Controller Interface) and OHCI(Open Host Controller Interface)
- Usable with desktops & notebooks
- Semi-permanent storage of your data
- A switch for protection of deleting file

- Storage over 60,000word document(1GB)
- Fast transporting speed
- Not need to take your notebook or pc for your business.

● Structure

Specification & Installation

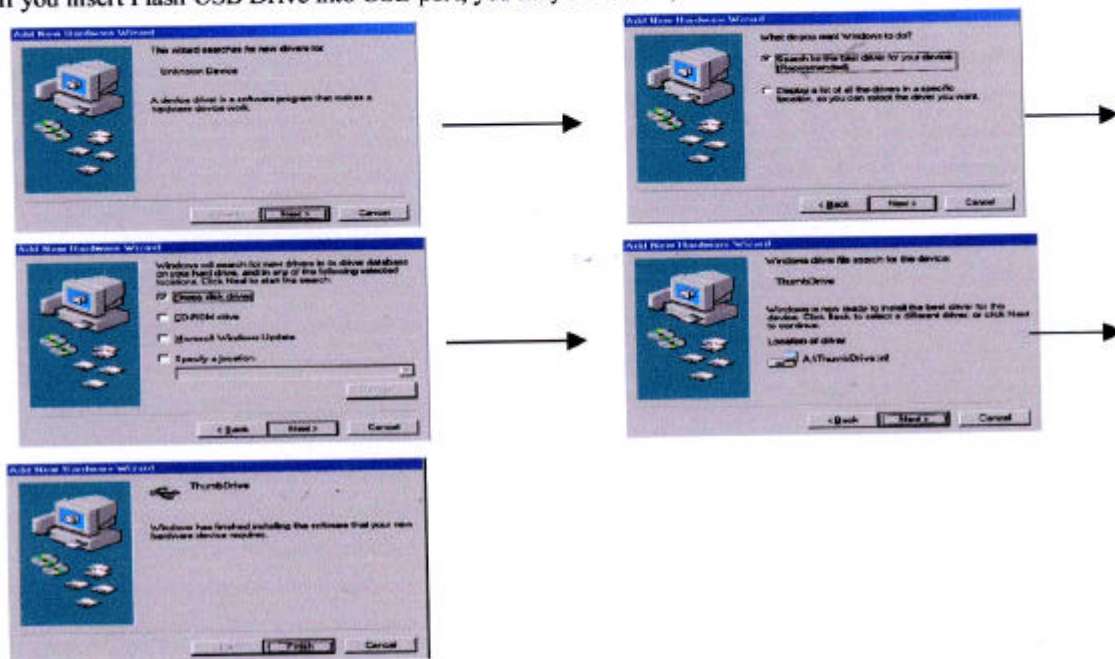

ITEMS	DESCRIPTION
